GLOSSARY OF TERMS:

Electricity:

This is the cost of the electricity supplied to you during this billing period and is the part of the bill that is subject to competition.

Delivery:

These are the costs of delivering electricity from generating stations across the Province to Newmarket-Tay Power Distribution Ltd. then to your home or business. This includes the costs to build and maintain the transmission and distribution lines, towers and poles, and operate provincial and local electricity systems. A portion of these charges are fixed and do not change from month to month. The rest are variable and increase or decrease depending on the amount of electricity that you use.

The delivery charge also includes costs relating to electricity lost through distributing electricity to your home or business. *Newmarket-Tay Power Distribution Ltd. collects this money and pays this amount directly to our suppliers.

*When electricity is delivered over a power line, it is normal for a small amount of power to be consumed or lost as heat. Equipment, such as wires and transformers, consumes power before it gets to your home or business.

Regulatory Charges:

Regulatory charges are the costs of administering the wholesale electricity system and maintaining the reliability of the provincial grid and include the costs of funding Ministry of Energy and Infrastructure conservation and renewable energy programs.

Debt Retirement Charges:

The debt retirement charge pays down the debt of the former Ontario Hydro.
